Appendix A

Price Proposal

Consultants shall propose a fee on the Price Proposal that is reflective of the full scope of work outlined in the duties listed above, including for Consultant's work in procuring energy through traditional bidding, an on-line reverse auction(s) and/or an e-procurement electronic platform, and all other consulting services outlined. This should be in the form of a stated price per-kilowatt hour and per-dekatherm, which would cover the fees and expenses payable to the Consultant, if Monmouth County decides to use an on-line reverse auction and/or e-procurement electronic platform, including contract administration of any such contract(s), both during the term of the Consultant's contract and thereafter, until the expiration of the Electric and/or Natural Gas supply contract(s). This price proposal should include fees to be paid to the Consultant's on-line reverse auction and/or e-procurement electronic platform company, if applicable. The third-party suppliers of Electricity and/or Natural Gas shall be solely responsible for payment of the Consultant's fee directly to the Consultant. The Consultant shall be responsible for negotiating the amount of the per-kilowatt hours and per-dekatherm fee to be paid on either a monthly or quarterly basis as agreed upon between the third-party supplier and the Consultant. The County will not be a guarantor of payments due to the Consultant, nor will it assume any direct or indirect financial liability for payments to the Consultant.

Price Per Kilowatt Hour \$0.00047/kWh

Price Per Dekatherm \$0.125/Dth

Concord will only recommend award of contracts that provide a value proposition to the County. In the event there is not a value proposition, we will not recommend award. Concord provides its energy advisory and consulting services with integrity and our fees are 100% at risk.
