

The Landscape is Changing & Invasive Species Are on the Move, but *Fear Not!*

Learn How to Stop Alien Invaders and Identify Suitable Alternatives

New Jersey is home to:

2,000 Plants
327 Birds
421 Fish
90 Mammals
44 Reptiles
35 Amphibians
180 Damselflies & Dragonflies
151 Butterflies

This list includes 424 threatened and endangered species, some which are imperiled worldwide.

Non-native invasive plants are a threat to our native flora and fauna for a number of reasons including outcompeting native species, reducing diversity and offering a less suitable food source.

Attend this workshop to:

- ✓ Learn the impacts of invasive plants
- ✓ Discover free tools that you can use to help identify and control invasive plants
- ✓ Learn about the native alternatives to common non-native, invasive plants

April 11th, 2015, 1pm -3pm
at Deep Cut Gardens, Middletown, NJ
Call (732) 671-6050 to reserve your spot!

Presented by:

New Jersey Audubon in partner with
New Jersey Invasive Species Strike
Team
