# **WHY IS SOME GRASS GETTING HIGHER?**

**It's a management choice!**

## **TALLER GRASS...**

- Enhances visual variety in the parks.
- Increases diversity of plants and provides habitat for wildlife like field nesting songbirds and butterflies.
- Promotes recreational and educational activities tied to botanical exploration and wildlife appreciation.
- Protects water quality by buffering adjacent streams.
- Allows park resources to be focused on high-maintenance areas.
- Contributes to cleaner air and a quieter park by reducing the use of gasoline-powered mowers.
