

## Monmouth County Park System Seven Presidents Playground Equipment and Surfacing Replacement

### PROJECT INFORMATION

---

#### PROJECT DESCRIPTION:

Work includes the removal and replacement of playground equipment in the play area for ages 5 through 12 and in the swing area. New playground equipment will include a new climbing structure, spinner, saucer swing, belt swing set, and bucket swing set. The rubber safety surface in the 5 through 12 play area will be removed and replaced in kind. The rubber safety surface in the swing area will be removed and replaced with artificial playground turf.

#### REASON FOR PROJECT:

The playground was constructed in 2009. Sand, salt, and sun exposure have weathered the equipment and surfacing. Over the past several years, equipment has been removed and surfacing patched to maintain playground safety.

#### DESIGN APPROACH:

Playground upgrades will conform with all Federal, State, and Local standards including ASTM F 1487-21, Handbook for Public Playground Safety, New Jersey Barrier Free Subcode, and ADA. Playground equipment selection prioritized inclusive play.

**PROJECT STATUS:** The project has been awarded to Whirl Construction, Inc. of Port Monmouth, NJ. Construction will commence in February 2025 with anticipated completion in May 2025.

Seven President's Tony's Place playground will be closed to the public during construction. Park visitors should expect disruption in the construction area.
