### **2.3.8. Indemnification**

The vendor hereby agrees to indemnify and hold harmless the Board of Recreation Commissioners and the County of Monmouth, their agents, servants, and employees from and against all loss, damage, claims, actions, liability and expense, in connection with the loss of life, bodily injury, and/or property damage, if occasioned in whole or in part by any negligent act or omission of the professional or the professional's agent's, servants, employees, and subcontractors limited to services performed under the terms and conditions of this contract. ### **2.3.9. Alternate Dispute Resolution**

**Non-Binding Mediation:** If a dispute between the County and the Contractor arises during the course of the contract, the parties will participate, in good faith, in non-binding mediation.

Either party may demand such mediation by written notice of the other party. The written notice shall contain at least (a) a brief statement of the nature of the dispute, and (b) the name, address and phone number of that party's designated representative for the purposes of mediation. The other party shall designate its representative for mediation in writing no later than five business days after receipt of the demand for mediation. The respective designees shall thereupon, and promptly, with due regard for the need for timely action, choose a mediator. If the parties cannot agree on a mediator, or if they prefer, they shall choose a reputable mediation firm. Any mediation firm so chosen shall present a list of at least five proposed mediators to the parties and shall provide the parties with a summary of each person's qualifications to serve as the mediator. Each party shall rank the proposed mediators in order of preference.

The fifth person on each list will be excluded from further consideration. The chosen mediator shall be the person who is the combined highest-ranking mediator on both preference lists excluding the fifth person on each list. In the event of a tie, the mediator shall be chosen by lot. The parties will not be bound by the Rules of Evidence in presenting the positions before the mediator.

The mediation shall be conducted in such reasonable and efficient manner as may be agreed between the parties and the mediator or, the lack of such an agreement, as may be determined by the mediator.

Each party will bear its own costs of participation in mediation and they will divide the costs of the mediations equally.

If, after a good faith effort to resolve the dispute through mediation, the dispute is not resolved, either party may terminate the mediation by written notice to the mediator and to the other part, whereupon either party may submit the dispute to the Superior Court of New Jersey, Monmouth County, for adjudication, which Court shall have exclusive original jurisdiction over the dispute.

## **2.4. Addenda**

All addenda will be posted on the Monmouth County Park System website ([www.monmouthcountyparks.com](http://www.monmouthcountyparks.com)). It is the responsibility of the vendor to check the website prior to submission of proposal.

## **2.5. Multiple Proposals Not Accepted**

More than one proposal from an individual, a firm or partnership, a corporation or association under the same or different names shall not be considered.

## **2.6. Failure to Enter Contract**

Should the vendor, to whom the contract is awarded, fail to enter into a contract within ten (10) days, Sundays and holidays excepted, the owner may then, at its option, accept the proposal of another vendor.

## **2.7. Commencement of Work**

The vendor agrees to commence work after receipt of a Purchase Order and upon notice from the using department to proceed.

## **2.8. Termination of Contract**

If, through any cause, the vendor shall fail to fulfill in a timely and proper manner obligations under the Contract if the vendor violates any requirements of the Contract, the owner shall thereupon have the right to terminate the Contract by giving written notice to the vendor of such termination at least 30 days prior to the proposed effective date of the termination. Such termination shall relieve the owner of any obligation for the balances to the vendor any sum or sums set forth in the Contract.

The vendor agrees to indemnify and hold the owner harmless from any liability to subcontractors/suppliers concerning payment for work performed or goods supplied arising out of the lawful termination of the Contract by the owner under this provision. In case of default by the vendor, the owner may procure the articles or services from other sources and hold the vendor responsible for any excess cost occasioned thereby.

## **2.9. Notice of Award**

The successful vendor will be notified of the award of contract upon a favorable decision by the governing body. The Purchasing Agent will then send a Purchase Order and Voucher to the vendor.

**2.10. Prompt Payment of Construction Contracts P.L. 2006, c. 96

The invoice shall be deemed approved and certified 20 days after the board receives it unless the board, before the 20 day period, informs the contractor in a written statement of the amount withheld and the amount to be paid, the reason for withholding the payment and how the deficiency can be cured.

In the event that Alternate Dispute Resolution is needed, mediation is the method that shall be used.

**2.11. Ownership of Material**

The owner shall retain all of its rights and interest in any and all documents and property both hard copy and digital furnished by the owner to the vendor for the purpose of assisting the vendor in the performance of this contract. All such items shall be returned immediately to the owner at the expiration or termination of the contract or completion of any related services, pursuant thereto, whichever comes first. None of the documents and/or property shall, without the written consent of the owner, be disclosed to others or used by the owner or permitted by the owner to be used by their parties at any time except in the performance of the resulting contract. Ownership of all data, materials and documentation originated and prepared for the owner pursuant to this contract shall belong exclusively to the owner. All data, reports, computerized information, programs and materials related to this project shall be delivered to and become the property of the owner upon completion of the project. 2. All requirements of accuracy for Conventional or Global Positioning System (GPS) surveying shall meet or exceed a positional accuracy defined as the Federal classification for Third Order, Class I accuracy as stated in "Standards and Specifications for Geodetic Control Networks," Federal Geodetic Control Committee (FGCC), September, 1984.

4. Quality Control shall be conducted by the surveyor to ensure accuracy, consistency and clarity in all documents, plans, and digital files being prepared, and that all specifications and requirements are adhered to and met. The liability for this work extends indefinitely because the surveyor's statute of limitations does not apply to survey work prepared for governmental agencies.
5. All original mylars and all paper copies of full size survey plans (not reduced plans) and all metes and bounds descriptions on company letterhead shall be signed and sealed by the New Jersey Licensed Professional Land Surveyor who is responsible for the preparation of the field survey, the field plan, and the metes and bounds description. 12. Accurate locations of all easements of record.
13. Locations of all water bodies, i.e., lakes, ponds, streams, wetlands, bogs, drainage ditches and swales.
14. Area in square feet and acres of all large water bodies (i.e., ponds and lakes).

15. Wetlands shown in accordance with NJDEP Wetlands Maps.
16. The property and all adjoining properties must be labeled with the now and formerly (n/f) property owner's name.
17. Area of property within each municipality shall be given to the thousandth of an acre or to three (3) decimal places when subject is located in more than one municipality. The overall area of the property shall be given in square feet as well as to the thousandth of an acre. (MCPS always requires area given to three (3) decimal places. This supersedes Green Acres specification 3.5.3.9).
18. Areas of property impacted by encroachments shall be clearly drawn and labeled with the dimensions of each encroachment shown. An enlarged detail of all encroachments shall be included on each survey that shows sheds, fences, buildings, structures, etc. The fee proposal shall include the cost to re-visit the site and re-shoot the line(s), if needed, in order to confirm that all encroachments have been removed, and the final survey shall reflect their removal.
19. For properties on tidal waterways, the surveyor shall establish the Mean High Water (MHW) line from tidal benchmarks and determine its elevation relative to NAVD 1988 (North Atlantic Vertical Datum) mean sea level vertical control. The MHW line and its elevation shall be shown on the survey. Tidal benchmarks are available through the State of New Jersey Department of Environmental Protection, Division of Coastal Resources. NAVD 1988 vertical control benchmarks are available through the State of New Jersey, Department of Transportation, Geodetic Survey Division.
20. All bridges shall be shown on the survey and labeled by bridge number. A bridge easement area 60' from the centerline and to the ends of the bridge and/or right-of-way shall be delineated on the survey with the area shown to the thousandth of an acre and labeled "Bridge Widening and Reconstruction Easement."

23. Show all public road rights-of-way and provide widths of sidelines and dimensions. If fee title extends to the center of a public road right-of-way or a waterway, the survey lines shall run to the center of the road or waterway. If the property is to be acquired in fee simple, subject to the paramount rights of the public, then the areas of those rights shall be shown, stated and described.
24. Survey information and graphic depiction of the parcel shall be drawn on the plan so that North points generally upward.

25. Bearings shall be shown on the drawing so that the corresponding metes and bounds description reads clockwise. Direction shall be indicated by small arrows.
26. Bearings shall be rounded to whole seconds of arc. Distances in US Survey Feet for survey courses shall be rounded to two (2) decimal places.
27. All property surveys must form closed polygons. General calls along roads or waterways are unacceptable without a tie line and are only permitted for existing deed calls or if specifically required. Tie lines are to be provided along waterways, and riparian claim lines.
28. The surveyor is responsible for defining all courses of the parcel being surveyed by mathematical survey expressions. All straight-line courses will be defined by bearings and distances with angular units stated in degrees, minutes and whole seconds of arc. Curves will be defined by radius, arc length, delta, chord bearing and chord length, and horizontal distances, radii of curves or lengths of arc must be stated in US Survey Feet to two decimal places.
29. The areas calculated in association with the property land survey shall be stated in square feet and acres, with acres rounded to three (3) decimal places unless the parcel is bounded, all or in part, by a waterway or a Tidelands Claim of the State of New Jersey. In such cases, the area shall be given to one decimal place (0.1 acre). Square footage shall be rounded to the whole square foot.
30. A location map shall be provided on the plan. The perimeter of survey shall be drawn on the location map and an arrow shall indicate the site. A portion of a USGS Quadrangle (1 inch equals 2,000 feet, 1:24,000 scale) is preferred. The surveyor shall state the name of the quad and provide the scale and graphic north arrow.
31. Private rights-of-way and easements for private roads crossing the parcel being surveyed shall be shown with record or physical width provided. Survey shall include recording information for maps, deed book and page or other information for private easements.
32. Survey shall show all areas of deed conflict and title uncertainty such as gores, overlaps or other areas of ambiguity. A separate legal description shall be provided for each gore area and overlap area. All adjoining records must be reviewed with the name of all adjoining owners, tax block and lot and deed book, deed page and recording information shown on the survey.

The perimeter survey line (subject property boundary line) shall always be depicted as a solid line and be the most prominent line weight of the main drawing. Interior lot lines shall be shown with a less prominent line weight.

35. If the property being acquired is a partial taking or is a new lot resulting from a formal subdivision, the surveyor shall show the proposed new lot number on both the plan and the metes and bounds description following the surveyor obtaining confirmation of the new tax lot number from the municipal Tax Assessor or, in the case of a formal subdivision, the Planning Board Secretary.
36. The Point of Beginning used in the metes and bounds description shall be shown on the plat and labeled "Description Point of Beginning" or "Point of Beginning" or "P.O.B", or similar notation, and must be tied into a corner of record or road intersection. The NJSPCS NAD1983 Northing and Easting coordinate values stated in US Survey Feet to two (2) decimal places must be labeled on the plat for the Point of Beginning. There shall be a County of Monmouth monument at the Point of Beginning, either installed by the surveyor or existing.
37. The surveyor shall identify at least four (4) points, one (1) per quadrant (North, South, East and West) on the plat, labeling the Northing and Easting NJSPCS NAD1983 coordinate values stated in US Survey Feet to two (2) decimal places for each. 39. If a portion of the property is being acquired, there shall be three (3) separate metes and bounds descriptions, one (1) of the overall property, one (1) of the partial taking and one (1) of the remainder.
40. The description of a bridge easement shall be included at the end of the parcel legal description and preceded by the statement, "**A portion of the described parcel shall not be encumbered by NJ Green Acres Program restrictions or conditions or other public park/open space restrictions or conditions and shall be designated as a bridge reconstruction and road widening easement reserved for future bridge and road repair and/or widening with such portion being bounded and described as follows:**"
41. The surveyor shall prepare on company letterhead a separate metes and bounds description pursuant to the survey of the property and with reference to the information contained on the plan of survey. This description is to agree with the results of the survey from which it is written in every detail, and for this reason, the description shall not include any information that does not appear graphically or in a factual note on the survey plan. The metes and bounds description shall not be produced on the plan of survey but shall consist of a separate document. The date of the survey and the latest revision date shall be shown on the description and shall correspond to the dates shown on the survey. The overall area of the property shall be given in square feet as well as to the thousandth of an acre. (MCPS always requires area given to three (3) decimal places. This supersedes Green Acres specification 3.5.3.9).

## **E. MONUMENTS**

42. Surveyor shall install **twenty-two (22)** 4"x 4" x 6"x 6" x 30", 60-lb. County of Monmouth survey monuments as supplied, at points specified by the Monmouth County Park System. Each monument shall be numbered by stamping the brass monument cap at time of installation as directed by the Monmouth County Park System with installed monuments to be identified by corresponding number on the survey. All monumentation, existing and installed, shall be shown and identified on the preliminary and final survey plat. Each course of the preliminary and final legal description shall call-out to all existing and installed monuments and identify the installed monuments by the number stamped on the brass cap, and as shown on the final survey plat. Installation and pick-up costs for these monuments shall be included in the overall survey cost. A per unit installation fee for any additional monuments shall be indicated on the Proposal Page, as well as a per unit deletion fee for any monuments not installed from the above amount. Surveyor shall mark each monument and/or iron pin set or found with a wooden witness lath no less than three (3) feet in length driven into the ground next to the monument or iron pin. This lath shall have a length of fluorescent surveyor's tape tied to the top to increase visibility and aid in locating monuments later. Either an existing or installed County of Monmouth monument shall mark the Point of Beginning, with this monument stamped #1.

To indicate the casting and stamping of each County of Monmouth monument, a detailed enlargement, not necessarily drawn to scale, shall be depicted on the survey plan. Each monument set in the field shall be stamped with the monument number. A copy of the County of Monmouth cap detail is attached.

The elevation above sea level referencing the North American Vertical Datum of 1988 (NAVD88) shall be stamped in the appropriate space on the brass cap of the monument installed at the Point of Beginning (Monument #1), or another monument as directed by the Monmouth County Park System.

Elevation shall be shown to the hundredth of a foot, or two (2) decimal places.

43. If County of Monmouth monuments cannot be installed during the time it takes to complete the survey, all on-the-ground angle points shall be permanently secured with an iron bar or pipe which shall be topped with a plastic cap bearing name and address of the survey company so concrete monuments may be installed later with all the (installed) monuments to be shown on the final survey and called out in the legal description and identified by number stamped on the brass cap. In the event concrete monuments cannot be installed when the property is being surveyed (due to physical constraints or monuments found), payment equal to the number of monuments to be installed multiplied by the "Per Monument Installation Cost" shall be held back until monuments can be installed.

## **F. DIGITAL FILES**

44. Three (3) digital survey files shall be submitted on one (1) standard CD-R compact disc that can be read by any CD-ROM with these files not to be compressed or zipped in any way. One (1) file shall be a digital file in AutoCAD .dwg format containing the full survey drawing. This drawing must be created at its real New Jersey State Plane Coordinate System, Map Datum NAD1983 position and the view shall be unrotated from the

coordinate system so that the NJSPCS NORTH points orthographically vertical in the screen.

One (1) file shall be a .dxf format **single layer** digital drawing containing the closed line polygon of the perimeter survey lines and certain other lines that are internal to the survey. Specifically, internal lines shall include public road or other public right-of-way lines, survey exception area lines, new survey tract lines created by this survey, funding participation limit lines, internal navigable or tidal water edge or mean high water lines, survey tie lines, New Jersey Tidelands Claims lines, clouded title lines, overlapping deed lines from adjoining deeds, or limit lines of new conservation or public access easements being created by this project.

This .dxf file shall not be a complete drawing file of the survey and shall contain no text. This file shall be created at its real New Jersey Plane Coordinate System NAD1983 position and the view shall be unrotated from the coordinate system so that the NJSPCS NORTH points orthographically vertical in the screen. The polygon shall be created from the coordinate geometry of its survey point of beginning through the final course of survey and terminus point.

To provide a uniform method of closure without degrading the quality of bearings used, enter the radial error of closure as a final closing arc between the survey point of beginning and the survey point of ending. Add this additional course by inverting from the point of ending to the point of beginning as a final course.

One (1) file shall be a full-sized digital PDF copy of the plan signed and sealed by the surveyor. This drawing need not be created at its real New Jersey State Plane Coordinates NAD 1983.
