3. Upon request by the Monmouth County Engineer, separate metes and bounds descriptions of additional right-of-way shall be prepared for either an adjoining County bridge or County road, or both, at no additional charge.
4. The surveyor shall prepare on company letterhead a separate metes and bounds description pursuant to the survey of the property and with reference to the information contained on the plan of survey. This description is to agree with the results of the survey from which it is written in every detail, and for this reason, the description shall not include any information that does not appear graphically or in a factual note on the survey plan. The metes and bounds description shall not be produced on the plan of survey but shall consist of a separate document. The date of the survey and the latest revision date shall be shown on the description and shall correspond to the dates shown on the survey. The overall area of the property shall be given in square feet as well as to the thousandth of an acre. (MCPS always requires area given to three (3) decimal places. This supersedes Green Acres specification 3.5.3.9).

5. In the heading of the Metes & Bounds Description all tax lots that are designated “Farm Qualified” by the local Tax Assessor shall include the “Q” designation with the lot number to ensure recording of the Deed by the County Clerk.

E. MONUMENTS

1. Surveyor shall install one (1) 4”x 4” x 6”x 6” x 30”, 60-lb. County of Monmouth survey monuments as supplied, at points specified by the Monmouth County Park System. Each monument shall be numbered by stamping the brass monument cap at time of installation as directed by the Monmouth County Park System with installed monuments to be identified by corresponding number on the survey. All monumentation, existing and installed, shall be shown, and identified on the preliminary and final survey plat. Each course of the preliminary and final legal description shall call-out to all existing and installed monuments and identify the installed monuments by the number stamped on the brass cap, and as shown on the final survey plat. Installation and pick-up costs for these monuments shall be included in the overall survey cost. A per unit installation fee for any additional monuments shall be indicated on the Proposal Page, as well as a per unit deletion fee for any monuments not installed from the above amount. Surveyor shall mark each monument and/or iron pin set or found with a wooden witness lath no less than three (3) feet in length driven into the ground next to the monument or iron pin. This lath shall have a length of fluorescent surveyor’s tape tied to the top to increase visibility and aid in locating monuments later. Either an existing or installed County of Monmouth monument shall mark the Point of Beginning, with this monument stamped #1.

To indicate the casting and stamping of each County of Monmouth monument, a detailed enlargement, not necessarily drawn to scale, shall be depicted on the survey plan. Each monument set in the field shall be stamped with the monument number. A copy of the County of Monmouth cap detail is attached.

The elevation above sea level referencing the North American Vertical Datum of 1988 (NAVD88) shall be stamped in the appropriate space on the brass cap of the monument installed at the Point of Beginning (Monument #1). Elevations of all other brass cap monuments shall be tabulated to include monument number and corresponding elevation and appear on the survey plat. Elevation shall be shown to the hundredth of a foot, or two (2) decimal places.

2. If County of Monmouth monuments cannot be installed during the time it takes to complete the survey, all on-the-ground angle points shall be permanently secured with an iron bar or pipe which shall be topped with a plastic cap bearing name and address of the survey company so concrete monuments may be installed later with all the (installed) monuments to be shown on the final survey and called out in the legal description and identified by number stamped on the brass cap. In the event concrete monuments cannot be installed when the property is being surveyed (due to physical constraints or monuments found), payment equal to the number of monuments to be installed multiplied by the “Per Monument Installation Cost” shall be held back until monuments can be installed.

F. DIGITAL FILES

1. Three (3) digital survey files shall be submitted on one (1) standard USB (Flash) Drive and/or CD-R compact disc that can be read by any CD-ROM with these files not to be compressed or zipped in any way. One (1) file shall be a digital file in AutoCAD .dwg format containing the full survey drawing. This drawing must be created at its real New Jersey State Plane

Coordinate System, Map Datum NAD1983 position and the view shall be unrotated from the coordinate system so that the NJSPCS NORTH points orthographically vertical in the screen.

One (1) file shall be a .dxf format **single layer** digital drawing containing the closed line polygon of the perimeter survey lines and certain other lines that are internal to the survey. Specifically, internal lines shall include public road or other public right-of-way lines, survey exception area lines, new survey tract lines created by this survey, funding participation limit lines, internal navigable or tidal water edge or mean high water lines, survey tie lines, New Jersey Tidelands Claims lines, clouded title lines, overlapping deed lines from adjoiner deeds, or limit lines of new conservation or public access easements being created by this project.

This .dxf file shall not be a complete drawing file of the survey and shall contain no text. This file shall be created at its real New Jersey Plane Coordinate System NAD1983 position, and the view shall be unrotated from the coordinate system so that the NJSPCS NORTH points orthographically vertical in the screen. The polygon shall be created from the coordinate geometry of its survey point of beginning through the final course of survey and terminus point.

To provide a uniform method of closure without degrading the quality of bearings used, enter the radial error of closure as a final closing arc between the survey point of beginning and the survey point of ending. Add this additional course by inverting from the point of ending to the point of beginning as a final course.

One (1) file shall be a full-sized digital PDF copy of the plan signed and sealed by the surveyor. This drawing need not be created at its real New Jersey State Plane Coordinates NAD 1983.

G. AWARD OF CONTRACT

1. Award of contract shall be based on lowest price submitted and other considerations. The Park System reserves the right to reject and not evaluate any applications from a surveyor who is currently late in performing previously assigned survey work for the Park System.

H. SURVEY DELIVERABLES

Three (3) preliminary prints of the survey plat and three (3) copies of the preliminary metes and bounds description shall be furnished for Park System review and approval before printing of the final survey. Preliminary print must show all encroachments and easements in detail, in accordance with the specifications.
2. For Green Acres Program projects only, upon review and approval by the Park System of the preliminary survey and preliminary metes and bounds description, the following shall be submitted to the Park System for Green Acres Program review and approval:

It is expressly agreed and understood that any approval by the owner of the services provided by the contractor pursuant to this contract will not relieve the contractor of the obligation to comply with the Act and to defend, indemnify, protect, and save harmless the owner pursuant to this paragraph.

It is further agreed and understood that the owner assumes no obligation to indemnify or save harmless the contractor, its agents, servants, employees, and subcontractors for any claim which may arise out of their performance of this Agreement. Furthermore, the contractor expressly understands and agrees that the provisions of this indemnification clause shall in no way limit the contractor's obligations assumed in this Agreement, nor shall they be construed to relieve the contractor from any liability, nor preclude the owner from taking any other actions available to it under any other provisions of the Agreement or otherwise at law.
