

DEVELOPMENT ACTIVITY REPORT

4th QUARTER 2020

Division of Planning, Monmouth County, New Jersey October 1, 2020 to December 31, 2020

Last Updated: 6/2/22

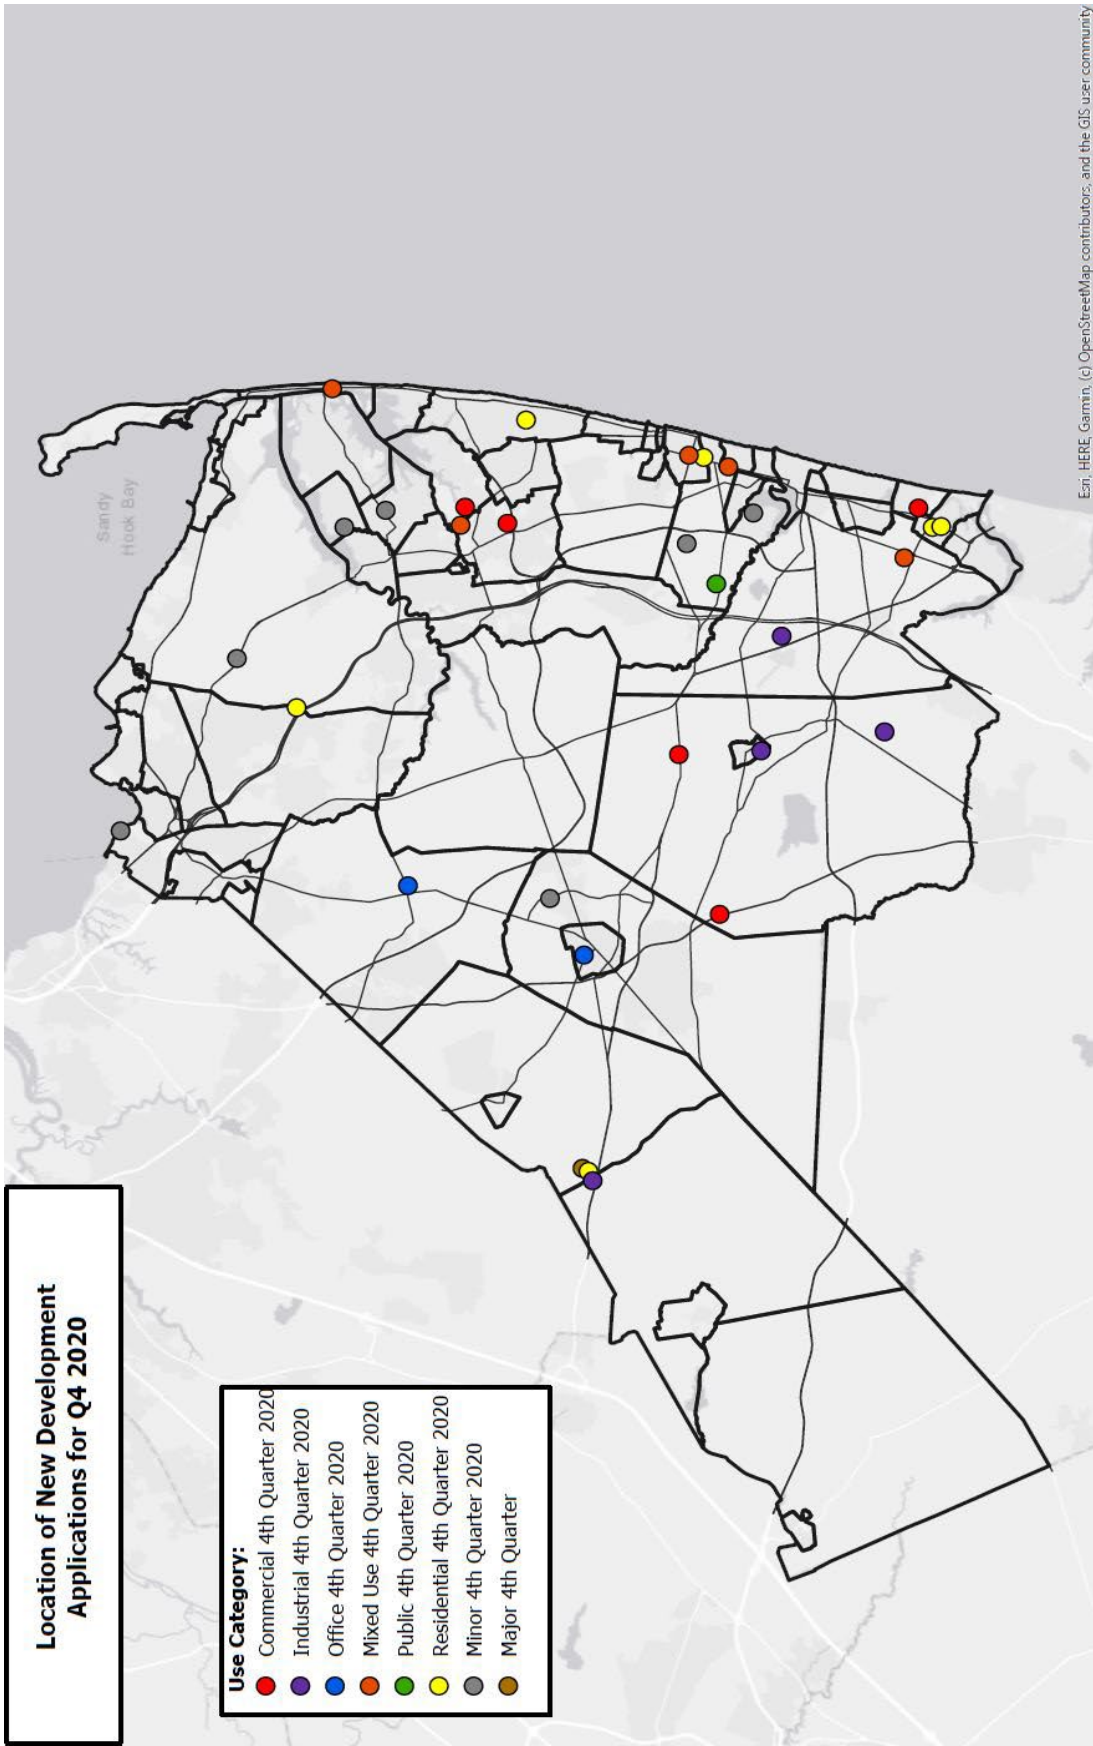

Purpose: The Development Activity Report provides a summary of county-wide development activity in Monmouth County, New Jersey for the 4th Quarter of 2020. This report details development activity on a quarterly basis to identify current trends and to compare these to previous quarters.

Highlights:

- Puglisi Egg Farms: 48,012 square foot addition to an existing Egg Farm/Warehouse in Howell.
Status - Final Approval - 11/9/2020
- 4158 Dunroamin Road: 44,770 square foot Commercial Warehouse/Office in Wall.
Status - Final Approval - 1/11/2021 (Received in the 4th of 2020 but acted on in the 1st quarter of 2021)
- Eatontown Art Barracks: 23,690 square foot Commercial Arts/Apartment buildings in Eatontown.
Status - Conditional Approval - 10/26/2020
- Manalapan Town Homes: 320 Unit Multi-Family Residential & Affordable housing project in Manalapan.
Status - Request Information - 11/23/2020

Summary of Development Statistics for Projects Submitted in Q4 2020 (fig. 1)

Use:	Building Area (square feet)	Multifamily Dwelling Units	Proposed New Building Lots	Number of Applications
Commercial	49,069			6
Industrial	104,168			4
Office	14,052			2
Mixed Use	28,277	33		5
Public	0			1
Residential Units		350		6
Minor Subdivision			6	7
Major Subdivision			227	1

(fig. 45)

Summary

The number of applications, residential development, and non-residential development projects have dropped when compared to last year's fourth quarter. Commercial development this quarter was located on or in close proximity to major roads and had a propensity to be in eastern, southern, and south-eastern towns. Additionally, all but one development were south of County Road 537 & State Highway 71. The exception to this was the Oport Partners project in Oceanport. Industrial development this quarter occurred in Farmingdale, Millstone, Howell, and Wall on or in close proximity to major roads. The two office development applications received this quarter were in Freehold Borough and Marlboro. Of the five mixed-use applications received this quarter, three were located in municipalities along the shore with the remaining two being located in Wall and Eatontown. The only public development proposed this quarter, driveway improvements at an existing Church/School, was located in Neptune. Residential development this quarter was primarily located in eastern municipalities along the shore with one to the north in Holmdel and one to the west in Manalapan. The steady residential development seen in Asbury Park last quarter continues this quarter with development becoming more steady in Holmdel and Manalapan. Minor subdivision applications were generally proposed in municipalities to the north of County Road 537 & State Highway 71 with exceptions in Freehold and Neptune Townships. The only major subdivision proposed this quarter was related to a large single-family and multi-family residential development in Manalapan.

In the fourth quarter of 2020, the county received 7 minor subdivision applications, 1 major subdivision application, and 1 public development application. The proportion of minor subdivision applications is fairly consistent with prior quarters this year. Industrial development applications had the largest total proposed building area at 104,168 square feet. Public development applications had the least total proposed building area with no new building area proposed.

The total proposed building floor area of commercial development in the fourth quarter fell sharply in 2017, and again in 2019. This year's fourth quarter represents the start of an increase in the total proposed building floor area for commercial development when compared to 2019. However, this quarter also represents the lowest number of commercial applications received in the fourth quarter within the past four years. The number of applications and the amount of floor area proposed for industrial development applications have decreased this quarter as compared to last year. Industrial development still represents the majority of new building floor area proposed this quarter. The drop in proposed floor area is not as drastic as the one between the fourth quarters of 2017 and 2018 but is still significant. The amount of office applications received this quarter is a slight decrease from how many were received in 2019. It is worth mentioning that in the past four years, only once has the county received more than three office applications in the fourth quarter. The proposed building floor area for office developments has gone up since 2019 but still sits below the amount proposed in 2017 and 2018. The amount of building floor area and residential units proposed this quarter for mixed/multiple use development applications is at the highest it has been since 2017. The number of mixed/multiple use development applications received in the fourth quarter is at the highest it has been since 2016. This year's fourth quarter represents a decline in proposed building floor area and applications received for public development. The number of residential development applications and proposed units is lower this quarter than in last year's fourth quarter but is still greater than the amounts seen in 2016, 2017, and 2018. There has been a decrease in both the number of proposed lots and number of minor subdivision applications received this quarter. This quarter represents the lowest amount of proposed lots and applications in the fourth quarter within the past four years. Finally, the number of major subdivision lots proposed had a sizeable increase while the number of applications decreased this quarter as compared to 2019.

Approval Status Stats for projects received in Q4 2020:

- Final Approval: 4
- Conditional Approval: 4
- Request Information: 9
- County Approval Not Required: 11
- Exempt: 3
- Incomplete: 1
