83%
Average Savings

Residents from around the country are benefiting from their towns hosting a Community Outreach. Whether they are confused about coverage options or need assistance with flood mapping, our professionals can offer the guidance they need with mitigation reporting and flood insurance premium information.

We will cover the current and upcoming NFIP Reform laws by reviewing the new regulations that can potentially effect their policies. We will also take residents through actual case studies where homeowners saved an average of 83% on their flood insurance premium after attending our program.

Residents will need to bring their Elevation Certificates and Flood Insurance Policy Declaration page to receive information on the best solutions available for their unique situation.

We will spend time with each attendee individually covering the following items:

- ELEVATION CERTIFICATE REVIEWS**
- CASE-BY-CASE AVAILABLE MITIGATION STEPS**
- NFIP POLICY REVIEWS**
- FLOOD INSURANCE QUOTES**
- FLOOD ZONE DETERMINATIONS**
- FLOOD ZONE RECLASSIFICATIONS**
- FLOOD RISK DEVELOPMENT ADVICE**
